16 DECEMBER 1988

### AUSTRALIAN MUNICIPAL INFORMATION SYSTEM (AMIS) 1988 DATA RELEASE

#### PHONE INQUIRIES

• for more information about the content of this publication or other inquiries concerning ordering and despatch—contact Kerry Russell on Canberra (062) 52 6153 or any of our State offices.

• about other statistics and ABS services—contact Information Services on Canberra (062) 52 6007, 52 6627, 52 5402 or any ABS State office.

#### MAIL INQUIRIES

• write to AMIS Contact Officer, Publishing and Electronic Dissemination Section, ABS, P.O. Box 10, Belconnen A.C.T. 2616.

#### ELECTRONIC SERVICES

• on VIATEL — \*656# • on AUSSTATS • phone (062) 52 6017.

• on TELESTATS — phone (062) 52 5404.

#### EXPLANATORY NOTES

1. This publication contains a large number of published ABS statistics for local government and other small areas. It is available on magnetic tape and microfiche.
2. the full set of data is provided on a time series basis on magnetic tape and microfiche, so this release supersedes previous releases.
3. From 1987 the area codes used in AMIS correspond to codes used in the ASGC. Refer to section 3 of the AMIS manual for details. Also from 1987 publication of the AMIS-Finance items, Group 26 (Historical Data) was discontinued. Please write to the AMIS Contact Officer or phone (062) 52 6153 if you require further information about these items.
4. Particulars concerning statistical content, tape specifications, etc., are contained in the AMIS manual. The December 1988 issue of the manual is a new edition.
5. This 1988 AMIS Manual contains Regional Summary Information on Diskette (RESIDE) Item Numbers which refer to a new service offering selected data from the AMIS database on floppy disk. For further information please write to the RESIDE contact officer or phone (062) 52 6153.

**INTRODUCTION  
AND  
DETAILS OF PACKAGE CONTENTS**

## INTRODUCTION

The Australian Bureau of Statistics developed the Australian Municipal Information System (AMIS) to service certain information requirements of the Australian, State and Local governments and other users of small area statistics. The service provides a range of socio-economic data in time series form.

The areas covered by AMIS are:

- (a) Statistical Local Areas (SLA);
- (b) Legal Local Government Areas (LLGA) not already covered as SLA's;
- (c) Statistical Divisions;
- (d) States.

From the 1987 edition, the area coding used in AMIS is based on the Australian Standard Geographical Classification (ASGC) for statistical purposes (Catalogue No.1212.0) sixth edition, July 1988. This publication is available separately from Information Services (see page 8). As not all statistical collections use the same version or section of the ASGC codes, it has been necessary to convert a number of other area coding systems to ASGC in order to have consistency across the data included in AMIS. (For a listing of the concordance between ASGC and local government areas see Table 3).

From the 1987 release onwards, "Finance - AMIS ITEMS" are not provided. The "Finance-AMIS ITEMS" have not been collected since 1981 and have been superseded by the "Revenue", "Outlay" and "Trading Activities" groups of the Standardised Local Government Finance Statistics (SLGFS) collection. The SLGFS items will continue to be included in AMIS releases. For historical purposes, the "Finance-AMIS ITEMS" are available separately on microfiche and magnetic tape.

Data included in AMIS are "time series" ie data for a particular series are shown for consecutive periods be they months, quarters or years. On AMIS, the Tourist Accommodation and Building series are quarterly, Population Census series are five yearly and all other series, except Retail Census, are annual. Retail data are published only after each retail census. The last retail census was held in respect of 1985-86. There was no Manufacturing Census held in 1985-86. These series have been resumed for the 1986-87 period.

This release completely replaces previous releases as all data are on a time series basis and are therefore updated and extended.

There has been a major change to the coverage of Tourism data included in AMIS. Confidentiality constraints have resulted in a very fragmented coverage of this data at the LGA level. It has, therefore, been decided that Statistical Division is the lowest level at which Tourism information will be included in AMIS.

From the 1988 edition, the 1986 Population Census data have been added. Some of the data items that were previously available are no longer available. Some of these changes have been caused by decisions made within the processing area, some due to changes in definition, and some value data being expanded due to inflation.

The changes are as follows:

(a) Age Groupings

<u>Old</u>	<u>New</u>
25 - 34	25 - 39
35 - 44	40 - 54
45 - 54	

(b) Individual Income

<u>Old</u>	<u>New</u>
\$4 001 - \$10 000	\$4 001 - \$12 000
\$10 001 - \$18 000	\$12 001 - \$18 000
-	\$26 001 - \$50 000
-	\$50 000 and over

(c) Occupation

Persons Employed

<u>Old</u>	<u>New</u>
Farmers, Fishermen	-
Miners, Quarrymen	-
Transport, Communication	-
Service, Sport, etc	-
-	Para-Professionals
-	Plant and Machine Operators
-	Labourers and Related Workers

(d) Weekly Rent

<u>Old</u>	<u>New</u>
\$100 - \$148	\$100 - \$149
\$149 and over	\$150 and over
-	\$150 - \$199
-	\$200 and over

(e) Monthly Mortgage Payment

<u>Old</u>	<u>New</u>
\$300 - \$398	\$300 - \$399
\$399 and over	\$400 and over
-	\$400 - \$499
-	\$500 - \$599
-	\$600 and over

From November 1988 a new service has become available. This service is the Regional Summary Information on Diskette (RESIDE). This service provides data on 5 1/4" floppy disks which are suitable for IBM compatible microcomputers. There are separate information papers and order forms for this service. The available data items are included in this manual in Table 1 with the item numbers shown down the left hand side of the page.

For all data groups, efforts have been made in this release to "fill" gaps in data series to allow for continuity over time periods.

Users are advised to exercise caution when deriving totals by summing components of data groups. Within some data groups there will be a discrepancy between the published total and the sum of the components. Generally this is due to the exclusion of confidential components. Those data groups affected are identified in Table 1, Index to Series.

#### CONTENTS OF DATA FILE

- Population Census data, including Labour Force and Housing characteristics
- Demographic Vitals data (including Population Estimates and Area of Region)
- Manufacturing data, including Australian Standard Industrial Classification (ASIC) subdivision data
- Retail Census data
- Agricultural Census data
- Local Government Finance data, from the Standardised Local Government Finance Statistics (SLGFS) Collection
- Tourist Accommodation data
- Building data
- Road Lengths.

#### COMPARABILITY OF DATA

Not all cells on the file are directly comparable. This occurs because:

- 1 The definition of a "year" for statistical/accountancy purposes may differ between states; NSW finance data is on a calender year basis; Victoria's data year ends 30 September, all other states' and the Commonwealth's data year ends 30 June.
- 2 Data for some LGA's are received late and may not be included in a particular release.
- 3 Figures are not available for some items at the time of an AMIS release eg retail data are collected at irregular censuses, the last one being 1985-86.
- 4 Differences occur in the geographic classifications used by the various collections contributing to AMIS.

## MAJOR LOCAL GOVERNMENT AREA CHANGES

The number of LGA's varies from time to time due to amalgamations and the growth of urban centres and subsequent re-alignment of LGA's. The nature of such changes are detailed in Table 4 - Boundary Changes - in this manual for those cases involving at least 100 persons.

## DETAILS OF AMIS DISSEMINATION PACKAGE

The AMIS package consists of this manual together with the data on microfiche and optionally the data on magnetic tape.

When amendments to the manual occur, replacement pages will be issued. A vertical line on the left hand side of a replacement page is used to indicate text which has been changed.

## SECTIONS IN THIS MANUAL

### Table 1 - Index of Series

This table provides a list of the series included in AMIS in the same order as they appear on the magnetic tape and microfiche. Also included is the periodicity, and start dates of each series.

### Table 2 - Explanatory Notes

This section consists of a general description of the data groups and, where practicable, of each series within each group. Also included are details of changes in definitions, or breaks in continuity etc.

### Table 3 - Description of Area Classifications and ABS Code Lists

This table provides definitions of the areas used in AMIS and a description of the area coding used. Also included are lists of SLA's in alphabetical order, grouped into the statistical divisions to which they relate and lists of SLA's against which are shown a number of relevant area coding systems which have been converted to ASGC's for AMIS purposes.

### Table 4 - Boundary Changes

This table lists, for each state, the major boundary changes (those involving at least 100 persons) for legal local government areas since 1.7.1967, Statistical local areas since March 1982 and also changes of name that have occurred during that period irrespective of whether there have been concurrent boundary changes or not.

## ABBREVIATIONS

This section provides a list of the abbreviations used throughout this manual.

ADDS	Agricultural Data Dissemination Service
AMIS	Australian Municipal Information System
ASGC	Australian Standard Geographical Classification
ASIC	Australian Standard Industrial Classification
LGA	Local Government Area
LLGA	Legal Local Government Area
NEI	Not Elsewhere included
RESIDE	Regional Summary Information on Diskette
SLA	Statistical Local Area
SLGFS	Standardised Local Government Finance Statistics

## MICROFICHE STRUCTURE AND FORMAT

Each microfiche contains 270 frames, each frame having 60 lines of 132 characters of information. The data are arranged in ASGC order, the data for each area spanning a variable number of frames. Data for a particular area may appear on 2 microfiche ie part of the data at the end of one fiche and the remainder of the data at the start of the next.

Information provided in the heading of each frame is as follows:

- (i) the first line gives the date of production of the fiche
- (ii) the third line gives the area name
- (iii) the fourth line gives the ASGC code

The data appears chronologically across and down each frame. The first four digits of the period code are the year and the last two the specific period (00 for annual data 01, 02, 03, 04 for quarterly data). Five periods of data are shown across each page.

## TAPE STRUCTURE AND FORMAT

The AMIS data tape file consists of many ASGC x DATA GROUP x DATE records. Each record contains a number of data items associated with the particular DATA GROUP. The number of data items may vary from one DATA GROUP to another.

### Record Structure

Each data record consists of a fixed length header and a fixed length data section. In COBOL terms the record structure is as follows:

```

01  AMIS -RECORD
  03  RECORD-HEADER.
    05  RECORD-KEY.
      07  ASGC                  PIC  x(11).
      07  DATA-GROUP             PIC  9(02).
      07  DATE.
        09  YEAR                 PIC  9(02).
        09  PERIOD                PIC  9(02).
    05  NUMBER-OF-DATA-ITEMS
  03  DATA-ITEMS
    OCCURS 1 TO 100 TIMES
    DEPENDING ON NUMBER-OF-DATA-ITEMS.
    05  DATA-SIGN               PIC  x(01).
      88  VALUE-NEGATIVE        VALUE  '-'.
    05  ITEM-VALUE              PIC  9(11).

```

The record variables are described as follows:

RECORD-LENGTH	- the length of the record in characters
ASGC	- ASGC code
DATA-GROUP	- DATA GROUP number (see Table 1)
YEAR	- Year of data in record
PERIOD	- Period of data in YEAR
NUMBER-OF-DATA-ITEMS	- Number of data items for DATA-GROUP
DATA-SIGN	- Data sign to be associated with ITEM-VALUE
ITEM-VALUE	- Absolute value of the data item

### Physical Structure

The AMIS data tape consists of blocked data records plus optional file header blocks. The data block size is 4000 characters. The data record size is 80 characters. Data records are not split across block boundaries. Where the data has not filled the block, then the block has been filled with zeroes.

### Tape Format

The standard tape characteristics provided for this service are:

9-track, phase encoded, 63RPmm (1600 BPI), ASCII code-set, ANSI label.

In addition the following tape characteristics are available on request

9-track, phase encoded, 63RPmm (1600 BPI), EBCDIC code-set, Standard label  
 9-track, phase encoded, 63RPmm (1600 BPI), ASCII code-set, unlabelled  
 9-track, phase encoded, 63RPmm (1600 BPI), EBCDIC code-set, unlabelled  
 9-track, PE, 246 RPmm(6250 BPI), EBCDIC code-set, unlabelled  
 9-track, PE, 246 RPmm(6250 BPI), 32RPmm, ASCII code-set, unlabelled

## WHERE TO CONTACT ABS OFFICES

There is an ABS office in Canberra, each State Capital City and Darwin. Contact Information Services at any of the addresses listed below for information on statistics and statistical publications handled by the ABS.

**TABLE 1**  
**INDEX OF SERIES**

TABLE 1 - INDEX OF SERIES

This table provides a list of the series included in AMIS in the same order that they appear on the dataset. Also included is the periodicity, and start and end dates of each series.

Unless indicated otherwise data are provided for SLA's, LLGA's that are not equivalent to SLA's, Statistical Divisions and States.

Finance	2.18
Road Lengths	2.21
Building	2.22

### POPULATION CHARACTERISTICS

Data is included for 1976, 1981 and 1986 Censuses where possible.

#### 1986 CENSUS OF POPULATION AND HOUSING

The 1986 Census of Population and Housing aimed at counting every person who spent census night (30 June 1986) in Australia, including persons on board long-distance trains, buses or aircraft. All private dwellings were counted, whether occupied or unoccupied. Caravans etc. in caravan parks comprise a separate dwelling category (see - Dwelling Characteristics). Occupied non-private dwellings, such as hospitals, prisons, hotels etc were included.

People were counted where they were on census night (place of enumeration), which may not be where they usually lived. Place of usual residence was asked of each person and, where usual residence differed from enumeration address, addresses were coded to statistical local area level (a new geographic spatial unit, see Description of Data Items - Census Counts). Visitors to Australia were enumerated regardless of how long they planned to stay. Australian residents out of the country on census night were excluded from the count.

Diplomatic personnel and their families are, by definition, out of the scope of the census, as are diplomatic residences.

The tables produced in AMIS are on a place of enumeration basis. Output is also available from the ABS on a place of usual residence basis.

Refer to Catalogue of 1986 Census Tables Final Edition (2175.0) for more information.

### DESCRIPTION OF DATA ITEMS

#### CENSUS COUNTS

Census counts have been compiled from the 1961 and 1966 Censuses using 1966 LGA boundaries, from the 1971 and 1976 Censuses using 1976 LGA boundaries and from 1976 and 1981 Censuses using 1981 LGA boundaries. From the 1986 Census the ABS has adopted the Australian Standard Geographical Classification (1216.0) as the standard for all ABS output. A new spatial unit, the statistical local area (SLA) has been introduced. SLAs are for the most part legal local government (LGA) based. In special cases, where a legal LGA is much larger and more populous than the general run of legal LGAs (as in the city of Brisbane), or where there are no legal local government authorities (as in the Australian Capital Territory), the SLAs are officially defined suburbs or localities.

#### LANGUAGE

A question on language has been regularly included in censuses since 1976 when persons were asked to state the languages regularly used. In the 1981 language question, all persons were asked if they used a language other than English at home and, if so, how well they spoke English; they were not asked to name the non-

English language. In 1986 the same information was sought as for 1981, except that in addition, users of a language other than English were asked to name the language.

Information derived from the question enables migrant welfare services to plan and co-ordinate programs.

#### LABOUR FORCE

For the 1986 Census, the labour force includes persons aged 15 years and over who:

- (a) worked for payment or profit, or as an unpaid helper in a family business, during the week prior to census night;
- (b) had a job from which they were on leave or otherwise temporarily absent;
- (c) were on strike or stood down temporarily; and
- (d) did not have a job but were actively looking for work.

A labour force status was given to all persons who fell within the scope of the labour force classification, ie to all persons aged 15 years or more. The three labour force status categories are:

- (i) employed persons (ie persons in groups (a), (b) and (c) above);
- (ii) unemployed persons (persons in group (d) above); and
- (iii) persons not in the labour force (ie persons aged 15 years or more) not in any of the groups (a) to (d) above. This category includes persons who are retired, pensioners, and persons solely engaged in home duties. It also includes bonded trainees (including trainee teachers), and cadets engaged in full-time study at educational institutions even if the institutions at which they studied were run by their employers.

Categories (i) and (ii) together make up the labour force.

In previous censuses, if the labour force questions were unanswered an attempt was made to derive the labour force status from other questions on the census form; where this was possible, a response was randomly allocated. For 1986 no random allocation was made and unanswered questions were coded to a new category called "not stated".

#### INDIVIDUAL INCOME

In the 1986 Census income question, persons were asked to state their usual gross weekly income, which is the income before tax and other deductions are made.

Gross income includes family allowance, pensions, benefits, wages, salary, overtime, dividends, rents received, interest, business or farm income (less operation expenses), superannuation and workers compensation received.

Persons were not asked to state their exact income. Instead, they were asked to indicate with a tick the range into which their income fell.

The classification allowed for a "no income" response and 13 income ranges, with the highest income range "over \$50,000". This classification differed from 1981 when the highest income range was "\$26,000 per year" and the incomes ranges below \$12,000 were more finely classified.

It should be noted that although the census question was asked in terms of weekly income, results are often tabulated in annual equivalents.

#### OCCUPATION

The definition of occupations means that an occupation classification relates basically to the kind of tasks performed. The classification of occupations from responses given on the census form is often difficult, because one kind of work can be described in different ways and, conversely, many different kinds of work can be described by a single name. For this reason, two questions were asked in the 1986 Census, one asking for occupation title (in main job) to be stated, the other asking for the main tasks and duties performed in that occupation. This gave the 1986 Census coders a better chance of correctly coding an occupation than by coding responses from one question only.

Occupation was classified in terms of the Australian Standard Classification of Occupations (ASCO) for the 1986 Census. In previous censuses, the Classification and Classified List of Occupations (CCLO) was used for occupation coding.

Responses to the 1986 Census questions on occupation were coded to the unit group level of ASCO; at this level there are 337 categories. In ASCO, a job is a set of tasks performed by one individual, and an occupation is defined as a set of jobs which require the performance of some or all of a common set of tasks.

To make comparisons of occupation data between 1986 and previous censuses, a 5 per cent sample of responses to the occupation questions by persons classified as in the labour force in the 1986 Census have been coded to both ASCO and CCLO. This has allowed for a quantitative link between the two classifications to be established. It is hoped that the ASCO/CCLO link will help minimise any problems caused by the change in classification.

Occupation was required to be reported for all employed persons aged 15 years and over.

#### INDUSTRY

The allocation of an industry class to an establishment (work location) is a statement about the main kind of economic activity understood to be carried out there. An establishment can be a farm, a factory, a shop, a mine, or any other place where some kind of economic activity is performed, ie a product produced or a service rendered. Each establishment is classified to a particular industry class according to the main activity of the establishment.

There is not necessarily any relationship between the occupation of an individual and the industry in which he or she worked; for

example, a van driver for an establishment designated as in the insurance industry was employed in that industry, not in the transport industry. One establishment may have employed many people in different occupations but they were all coded to the industry of the establishment.

The industry classification system used by the ABS is the Australian Standard Industrial Classification (ASIC), 1983 edition.

#### MODE OF TRAVEL TO WORK

This question asked each person aged 15 years and over, who worked during the week before the census, how they travelled to work on Monday 30 June 1986.

The question allows for multiple answers in all categories except "walked only" and "did not go to work"; for example, a journey to work by car (as driver), ferry and bus was recorded as such. Respondents were not asked to state which was the main method of transport.

#### DWELLING CHARACTERISTICS

For the 1986 Census dwellings are classified into the following basic groups:

- (a) private dwellings:
  - (i) occupied, and
  - (ii) unoccupied;
- (b) occupied caravans etc in caravan parks; and
- (c) non-private dwellings.

A private dwelling is normally a house, flat, part of a house, or even a room but can also be a house above shops or offices, a boat, or a tent if it is standing on its own block of land. A caravan situated on a residential allotment is also classed as a private dwelling.

An occupied private dwelling is defined as the premises occupied by a household on census night (except households occupying caravans etc. in caravan parks). A household is either a person living alone or persons living and eating together as a domestic unit. This means that the total number of occupied private dwellings in an area, as measured by the census, may be greater than the known number of occupied dwelling structures because more than one household can occupy one dwelling structure. For example, a single house maybe divided into two units by permanently closing a door. If each of these units is occupied, this one structure is counted as two households and two dwellings.

Unoccupied private dwellings are structures built specifically for living purposes which are habitable, but are unoccupied at the time of the census.

An occupied caravan etc. in a caravan park is a new category created for the 1986 Census. In previous censuses they were considered to be contained within a non-private dwelling (the caravan park), which meant that no family relationship data were

collected from their occupants. For the 1986 Census, an occupied caravan, tent, cabin, etc. in a caravan park contained a household. This change affects some comparisons between censuses on household and family data, and non-private dwellings counts. Occupied boats in marinas are also included in this category.

Non-private dwellings are residential with accommodation not included in the dwelling categories listed above and are classified according to their function. These dwellings include hotels, motels, guest houses, gaols, religious and charitable institutions, defence establishments, hospitals, etc.

Unoccupied non-private dwellings are not included in any census counts nor are unoccupied caravans in caravan parks.

#### NATURE OF OCCUPANCY

This characteristic indicates whether households were renting, purchasing or own the dwelling in which they were enumerated. This only applies to private dwellings and excludes caravans etc. in caravans in caravan parks.

#### MORTGAGE PAYMENTS - TOTAL MONTHLY

This characteristic records the monthly loan repayments (in dollars) by households for the purpose of purchasing the dwelling in which they were enumerated.

The 1976 Census included a question on source of mortgages. This information was not sought in the 1981 and 1986 Censuses.

Because of price and income changes between censuses, caution must be exercised when making inter-censal comparisons of this item.

For further information on the above characteristics, see The 1986 Census Dictionary (2174.0).

#### RENT - AMOUNT PAID

This characteristic relates only to rented occupied private dwellings.

## VITALS

Vital statistics for States and Territories are compiled on two bases;

- (i) in respect of the usual residence of the mother or of the deceased and
- (ii) in respect of the State or Territory where the registration of the birth or death took place:

A birth may be registered in a State other than the State in which the mother usually resides, particularly in an area near a State border. Similarly, a death may be registered in a State other than the State in which the person usually resides particularly in an area near a State border. The Vitals data in AMIS is presented on the usual residence basis. Births and deaths which took place outside Australia are excluded from the statistics.

Refer to Births, Australia (3301.0) and Deaths, Australia (3302.0) for more information.

### DESCRIPTION OF DATA ITEMS

#### BIRTHS

There is usually an interval between the occurrence and registration of a birth and, as a result of delay in registration, some births occurring in one year are not registered until the following year or even later. However 98 percent of all births are usually registered within 3 months of occurrence.

Figures for births do not include fetal deaths (stillbirths).

#### DEATHS

There is usually an interval between the occurrence and registration of a death, and as a result of delay in registration, some deaths occurring in one year are not registered until the following year or even later. However 99 percent of all deaths are usually registered within 6 months of occurrence.

Figures for deaths do not include fetal deaths.

#### POPULATION ESTIMATES

The total population as estimated by the ABS at 30 June for each Statistical Local Area and Local Government Area.

#### AREA

The total area for each Statistical Local Area and Local Government Area is shown in hectares.

## MANUFACTURING

### CENSUS OF MANUFACTURING ESTABLISHMENTS

The Manufacturing Census is conducted as a component of the ABS's integrated economic statistics system. This system has been developed so that data from each industry sector conform to the same basic conceptual standards thereby allowing comparative analysis between and across different industry sectors. The results of this census are therefore comparable with economic data collections undertaken for the mining, electricity and gas, construction, wholesale trade, retail trade industries transport and selected services.

Manufacturing, as specified in Division C of the Australian Standard Industrial Classification (ASIC), broadly relates to the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand.

The period covered by the annual Manufacturing Census is in general the twelve months ended 30 June. Where businesses find it impossible to supply information on this basis a substitute accounting period is used.

In accordance with the ASIC the basic census unit (referred to as the establishment) in respect of which statistics are collected in integrated economic censuses is in general a unit covering all the operations carried on under the ownership of one enterprise (business) at a single physical location. For Manufacturing Censuses, a manufacturing establishment is thus predominantly engaged in manufacturing activities, but the data collected for it cover (subject to the exception mentioned below) all activities at the location, namely:

- (a) the manufacturing activities primary to the industry class to which the establishment is classified;
- (b) any other manufacturing activities (ie production of commodities primary to another manufacturing industry class);
- (c) any selling and distribution activities connected with the commodities manufactured;
- (d) any non-manufacturing activities (eg merchanting of goods not manufactured by the establishment, extraction of raw materials for use by the establishment).

The exception relates to locations where the subsidiary activities exceed a specified value which varies from year to year in terms of sales and transfers out of goods and services during the year; these locations are treated for statistical purposes as two or more establishments corresponding to the various kinds of activity carried on.

Refer to Manufacturing Establishments: Details of Operations by Industry Class, Australia (8203.0) for individual census years for more information.

The establishment statistics also include data relating to separately located administrative offices and ancillary units (such

as head offices, storage premises and manufacturers sales branches or sales offices) serving the establishment and forming part of the enterprise which owns and operates the establishment. It should be noted however that sales branches or offices which distribute to customers from stocks held by them are classified to the wholesale industry.

The full range of data is published for all manufacturing establishments owned by multi-establishment enterprises and single establishment manufacturing enterprises with four or more persons employed. However, as a sample component was introduced into the 1986-87 Manufacturing Census, the 1986-87 figures for these establishments for stocks, expenses and value added are subject to some sampling error. Figures for employment at 30 June, wages and salaries and turnover contain no sampling error. For single establishment manufacturing enterprises with fewer than four persons employed only turnover, employment and wages and salaries data are published. These small enterprises contribute only marginally to statistical aggregates other than number of establishments.

The data for all establishments (see series in data group 6) is shown by SLA and LLGA. The data for all establishments (excluding single establishment enterprises with fewer than 4 persons employed (see series in data group 7)) is shown by Statistical Division.

The classification of census units to industry is based on the 1983 edition of the ASIC.

#### DESCRIPTION OF DATA ITEMS

##### ESTABLISHMENTS AT 30 JUNE

The number of establishments in operation at 30 June relates to manufacturing establishments as such and does not include the numbers of separately located administrative offices and ancillary units.

##### EMPLOYMENT

Working proprietors and employees on payroll, including those working at separately located administrative offices and ancillary units.

##### WAGES AND SALARIES

The wages and salaries of all employees of the establishment, including those working at separately located administrative offices and ancillary units. Drawings of working proprietors are excluded.

##### TURNOVER

Sales (exclusive of excise and sales tax) of goods whether produced by the establishment or not, plus transfers out of goods to other establishments of the same enterprise, plus bounties and subsidies on production, plus all other operating revenue from outside the enterprise (such as commission, repair and service revenue and,

from 1978-79, rent, leasing and hiring revenue), plus capital work done for own use, or for rental or lease. Receipts from interest, royalties, dividends, and the sale of fixed tangible assets are excluded.

Transfers to and from other establishments of the enterprise are valued, for statistical purposes, at prices commensurate with the prices which would have been received or paid if the establishments concerned had been under separate ownership, ie at commercial selling price. A significant proportion of the commodities manufactured by some industries (eg the petroleum refining industry) is manufactured on commission for non-manufacturing enterprises from materials owned and supplied by those enterprises. As a consequence the turnover figures do not reflect the gross value of those commodities but only the commission earned relating thereto.

#### STOCKS - OPENING AND CLOSING

Stocks of materials, fuels, etc and finished goods and work-in-progress of the establishment whether located at the establishment or elsewhere.

#### PURCHASES, TRANSFERS IN AND SELECTED EXPENSES

Purchases of materials, fuels, power, containers, etc and goods for resale, plus transfers in of goods from other establishments of the enterprise, plus charges for commission and sub-contract work, repair and maintenance expenses, outward freight and cartage, motor vehicle running expenses and sales commission payments and, from 1978-79, rent, leasing and hiring expenses.

Transfers in and selected expenses are valued, for statistical purposes, at prices commensurate with the prices which would have been received or paid if the establishments concerned had been under separate ownership, ie at commercial selling price. A significant proportion of the commodities manufactured by some industries (eg the petroleum refining industry) is manufactured on commission for non-manufacturing enterprises from materials owned and supplied by those enterprises. As a consequence the value of materials used in producing those commodities is not reflected in the figures for purchases, transfers in and selected expenses.

#### VALUE ADDED

Turnover, plus increase (or less decrease) in the value of stocks, less purchases, transfers in and selected expenses.

While value added is the basic measure of an industry's contribution to total production it cannot be inferred that when wages and salaries are deducted from value added, the whole of the surplus is available for profit. There are many miscellaneous expenses (such as depreciation, workers' compensation insurance, other insurance, payroll tax, income tax, rates, advertising, interest on borrowed funds, bad debts, and other sundry charges) which are not taken into account in arriving at value added. Value added as calculated in the Manufacturing Census differs from the concept used in the National Accounts, where the concept of value

added also excludes some administrative expenses and sundry charges, and the change in stocks component is measured by valuing the physical change in stocks at current prices.

FIXED CAPITAL EXPENDITURE

Fixed capital expenditure was not collected in 1986-87.

RETAIL TRADE

## CENSUS OF RETAIL ESTABLISHMENTS

Retail trade data on AMIS were compiled from the 1985-86 Retail Census. The statistics relate to all establishments classified to Australian Standard Industrial Classification subdivision 48 - Retail Trade except Bread and Milk Vendors, Shoe Repairers and Electric Appliance Repairers n.e.i.

Retail Trade, as specified in the Australian Standard Industrial Classification, generally includes the resale of new or used goods to final consumers for personal or household consumption. Also, to conform with the concepts and definitions used in the Australian National Accounts, the sale of certain commodity items are treated as wholesale rather than as retail sales. These commodity items are building materials; builders' hardware and supplies such as tools of trade, paint, etc.; commercial refrigerators; business machines; tractors, farm machinery and implements, earth moving equipment; and grain, feed, fertilisers and agricultural supplies. Consequently, where sales of these items constitute the predominant activity of an establishment, the establishment has been classified as a wholesale establishment and not included in the retail census. Where sales of these items are made by an establishment predominantly engaged in retail activities, then the sales of these commodities are shown in economic census tabulations as wholesale sales and are included in turnover figures. It should be noted that establishments mainly engaged in both baking and retailing cakes are treated as retailers, but establishments mainly engaged in both baking and retailing bread are treated as manufacturers and are included in the Manufacturing Census. In addition, the following industry classes - 4861 New Motor Vehicle Dealers, 4862 Used Motor Vehicle Dealers, 4866 Motor Cycle Dealers and 4867 Boat and Caravan Dealers - include all establishments predominantly engaged in either wholesaling or retailing new or used motor vehicles, motor cycles, boats, caravans, trailers etc., as appropriate. Sales of motor vehicles (other than sales to motor vehicle dealers) whether for industrial, commercial or private use were treated as retail sales in the census (despite the inclusion of some wholesale sales). Establishments whose predominant activity is wholesale or whose predominant activity is wholesaling new tyres, tubes, batteries or new motor vehicle parts or accessories have been classified as wholesale establishments.

Because of difficulties in ensuring adequate coverage, some types of establishments were excluded from the census even though they would have been classified to industries covered by the census. These are door to door salesmen, independent van salesmen, and occasional stall holders. In addition, details were not collected from organisations operating vending machines on the premises of other businesses.

## DESCRIPTION OF DATA ITEMS

Establishments at 30 June: The number of establishments in operation at 30 June relates to retail establishments as such and does not include the number of separately located administrative offices and ancillary units.

Employment at 30 June: Working proprietors and employees (including both full time and part time) on the payroll, including those working at separately located administrative offices and ancillary units. Unpaid helpers are excluded.

Wages and Salaries: The wages and salaries of all employees of the establishment, including those working at separately located administrative offices and ancillary units. Drawings of working proprietors are excluded.

Turnover: Sales of goods (retail and wholesale); all other operating revenue from outside the enterprise such as repair and service revenue; hiring of consumer goods, commissions; and rent, leasing and hiring revenue. Receipts from interest, royalties, dividends and the sale of fixed tangible assets are excluded.

Refer to Retail Census: Details of Operations Australia, 1985-86 (8622.0) for more information.

## AGRICULTURAL ACTIVITY

### AGRICULTURAL CENSUS

Most of the agricultural statistics published by the ABS and all of the agricultural statistics included in AMIS are derived from the annual Agricultural Census. The Census which is conducted throughout Australia at 31 March, collects data from establishments with agricultural activity.

The ABS excludes from the Census those establishments which make only a small contribution to overall agricultural production. This has been done to minimise respondent burden and reduce processing costs. Since 1976-77, establishments with agricultural activity have been included in the Agricultural Census if the operating enterprise had, or was expected to have an estimated value of agricultural operations of \$1,500 or more. In 1981-82 this figure was raised to \$2,500 in order to minimise the effects of inflation on the scope of the Census. Since 1982-83 establishments with agricultural activity are now included if they had an estimated value of agricultural operations of \$2,500 or more.

(While these changes have resulted in some changes in the number of establishments appearing in publications the effect on the statistics of production of major commodities is small. Statistics of minor commodities normally associated with small scale operations may be affected to a greater extent).

The estimated value of agricultural operations is obtained for each establishment by applying unit values to crop and livestock information collected in the Agricultural Census. The unit values used are three year weighted average prices as these reduce the effects of short term price fluctuations.

### AGRICULTURAL ESTABLISHMENTS

Economic units engaged in agricultural activity are delineated within a hierarchy of units - the enterprise group, enterprise and establishment. The establishment, which is the smallest economic unit in the system, covers all operations carried out by one enterprise at a single physical location. For the agricultural sector, a physical location has been interpreted to mean each individual agricultural holding. However, where two or more holdings in the one local government area (county in South Australia) are operated under one management, the holdings are combined to form one establishment.

The term 'agriculture' is used here in the broad sense to include the breeding, keeping or cultivation of all kinds of animal or vegetable life except forest trees and marine life. However, non-land-based agricultural activities such as beekeeping are not included in small area statistics (eg the local government area aggregates included in AMIS), although they are incorporated into State and national aggregates (published elsewhere by the ABS).

## DESCRIPTION OF DATA ITEMS

All statistics are as at 31 March, except wool production which is for the year ended 30 June.

## NUMBER OF ESTABLISHMENTS

This is the total of establishments reporting agricultural activity during the year ended 31 March. It includes beekeepers whose activities are non-land-based as well as nursery establishments whose data are not included in small area statistics (eg AMIS).

## AREA OF ESTABLISHMENTS

Comprises areas of crops and sown pastures and grasses as well as land used for grazing, lying idle, fallow, etc. Some establishments would also include land not suitable for agriculture. Beekeepers, whose activities are non-land-based, do not have areas of establishment.

## AREA OF SOWN PASTURES AND GRASSES

Comprises lucerne, clovers and grasses which are high yielding pasture plants introduced to replace native vegetation and to improve livestock carrying capacity. Excludes native pasture.

## AREA OF WHEAT FOR GRAIN

Excludes area of wheat for hay, green feed or silage.

## AREA OF BARLEY FOR GRAIN

Includes the two types of barley for grain, 2-row (over 90% of area sown) and 6-row. Excludes area of barley for hay, green feed or silage.

## AREA OF OATS FOR GRAIN

Excludes area of oats for hay, green feed or silage.

## AREA OF SUGAR CANE CUT FOR CRUSHING

Includes only those plantings cut for crushing to sugar. Excludes plants cut for propagation or those immature or stood over for harvesting in the following season.

## AREA OF GRAIN SORGHUM

Excludes area of grain sorghum for green feed or silage.

## AREA OF SUNFLOWERS

## AREA OF POTATOES

Includes both early and late potato crops.

AREA OF TOMATOES

Includes area of tomatoes for processing and fresh markets as well as field/glasshouse growing.

AREA OF ONIONS

Includes both white and brown onions

AREA OF ORCHARD TREES (INCLUDING NUTS)

Comprises citrus, pome, stone and other fruit, and nut trees, both bearing and not yet bearing. Excludes plantation type fruit such as bananas, papaws, passionfruit, pineapples and berry fruit.

AREA OF GRAPEVINES

Comprises bearing and non-bearing vines.

NUMBER OF BEEF CATTLE AND CALVES

NUMBER OF DAIRY CATTLE AND CALVES

These include house cows and heifers kept primarily for farmers' own milk supply.

NUMBER OF SHEEP AND LAMBS

NUMBER OF PIGS

SHORN WOOL PRODUCTION

This comprises shorn wool (including crutchings). Wool from sheep and lambs shorn more than once in the season is included but dead wool is excluded.

The 19 agricultural items which are included in AMIS are only a small selection of the range of agricultural data available from the ABS. For users who require a wider range of detailed agricultural data the ABS also provides, on magnetic tape and microfiche, an Agricultural Data Dissemination Service (ADDS). ADDS is produced annually and includes data for approximately 500 items for approximately 900 small areas (usually LGA's) throughout Australia. For further information on ADDS please contact the ADDS Contact Officer on (062) 526436.

TOURIST ACCOMMODATION

The scope of this survey may vary from time to time depending on the needs of the users and the ABS resources available. The types of establishments currently included in the survey are:

**Tourist Accommodation Establishment:** An establishment which predominantly provides accommodation of a short term nature (ie for periods of less than 2 months) to the general public.

**LICENSED HOTEL (WITH FACILITIES)**

A tourist accommodation establishment which is licensed to operate a public bar, provides bath or shower and toilet in most guest rooms, and has breakfast available for guests.

**MOTEL (LICENSED OR UNLICENSED), PRIVATE HOTEL OR GUEST HOUSE (WITH FACILITIES)**

A tourist accommodation establishment which provides bath or shower and toilet in most guest rooms, and has breakfast available for guests, but is not licensed to operate a public bar. This also includes motels that are licensed to serve liquor with meals.

**CARAVAN PARK**

A tourist accommodation establishment which provides powered sites for caravans and toilet, shower and laundry facilities for guests. Data for caravan parks are shown for guests staying for short-term periods, ie 2 months or less.

**DESCRIPTION OF DATA ITEMS**

**Number of Establishments:** The number of tourist accommodation establishments within the scope of the survey which operated during the survey period or closed temporarily because of seasonal reasons. Establishments comprising more than one type of accommodation activity (eg a motel with attached caravan park) are treated as two separate establishments. Included are those establishments which operated for any part of the quarter or which closed temporarily for the quarter because of seasonal reasons.

**Capacity of Establishments:** In the case of hotels and motels with facilities, capacity of establishment refers to the maximum number of rooms, units, suites, etc. available for accommodating paying guests during the survey period. In the case of caravan parks, capacity of establishment refers to the maximum number of on-site vans, other powered sites, unpowered sites and cabins, flats etc available for accommodating paying guests during the survey period.

**Room Occupancy Rate:** The proportion of guest rooms occupied in hotels and motels with facilities to the number of guest rooms available during the survey period, expressed as a percentage.

**Site Occupancy Rate:** The proportion of sites occupied in caravan parks to the total caravan park capacity available during the survey period expressed as a percentage.

## FINANCE

As noted in the 1979-80 AMIS supplement, a collection of standardised local government finance statistics (SLGFS) was introduced in 1979-80.

Difficulties encountered with the processing of data for this first year led to some discrepancies in the published figures occurring between groups of items and sub-totals. Where this has occurred the component items are, in general, more reliable than the sub-totals.

All local authorities throughout Australia are required to compile statements of accounts for audit purposes. In all States except Victoria, the ABS uses copies of the accounts as a primary data source for local government finance statistics. These accounts are generally supplemented by questionnaires which request additional detail on each local authority's activities.

The source data is derived from a mixture of both cash and accruals accounting systems as used by the LGA's, and no attempt has been made to adjust the data to an accruals basis which would be conceptually correct for Australian National Accounts purposes.

### REFERENCE PERIODS

Except for New South Wales and Victoria the reference period for the statements of accounts and questionnaires of all States and the Northern Territory relates to the year ended 30 June. The New South Wales data relate to the year ended 31 December, the reference period is 6 months earlier than those using the year ended 30 June reference period. The Victorian data relate to the year ended 30 September and the reference period is 3 months later than those using the year ended 30 June reference period.

### DESCRIPTION OF DATA ITEMS

#### REVENUE

##### ORDINARY SERVICES - RECEIPTS

This table provides an overall summary of an LGA's receipts (from revenue and loans) for ordinary services.

Rates (including penalties): The total of gross rates levied, government subsidies for pensioner rates, government subsidies for special cases (eg subsidies to encourage decentralisation of industry) and penalties charged on overdue rates less discounts for early payment, pensioner remissions and reductions, and other remissions (eg in cases of special hardship or as encouragement for decentralisation of industry).

Garbage charges: Includes only those charges relating to the collection and disposal of domestic or household garbage. As some councils finance garbage services from the general rate, this item should be examined in conjunction with Rates levied.

Other fees, licences and fines: Includes building fees, parking fines, dog registration, other fees licenses and fines and other charges.

Reimbursements received for Roads: Includes reimbursements paid by a state road authority for work performed by a council on those roads which are the responsibility of the state road authority.

Government grants: Includes general purpose Government grants as tax revenue sharing grants, local government assistance grants and other untied grants. Also includes special purpose government grants (including unemployment relief grants) for the purchase or construction of new or existing fixed assets and for assistance with the operating expenses or running costs of services including repairs and maintenance of plant and equipment and the purchase of consumable items.

Other revenue: Includes all other revenue other than loan receipts (eg trading receipts, land sales, interest received, etc).

Total loan receipts: Includes loans from Commonwealth and State governments and loans from other lenders.

#### ORDINARY SERVICES - OUTLAY - PURPOSE

##### PURPOSE CLASSIFICATION

General Public Services: Includes only those expenses relating to council members, executive staff and general office (including council chamber expenses), ie 'head office' type expenses only.

Public Order and Safety: Includes fire protection costs, animal control, and other public order and safety costs (eg lifesaving, beach patrols, and contributions to State emergency services).

Education: Includes kindergartens and other centres having qualified teachers and which are primarily educational institutions. Also included are the operation of school bus services, student hostels and the provision of scholarships etc.

Health: Includes services for infants and mothers such as baby health centres and the provision of mothercraft nursing services; preventative services such as health administration, immunisation and X-ray programs, school dental and health schemes and the eradication of noxious insects and vermin; and other health services such as ambulance services, hospitals and home nursing.

Welfare: Includes services for families and children such as creches, child minding centres and other play centres and services such as emergency home help; services for the aged and disabled such as senior citizens centres, meals-on-wheels; and other welfare services such as women's refuge (crisis) centres, drop-in centres for the unemployed or youth, services to migrants, and social workers salaries.

Housing: Relates to the provision of housing for rental or use by employees and houses for sale to the public. Includes housing for aged persons and aborigines.

Community Amenities: Includes household garbage services, operation of rubbish tips, trade waste disposal, cleaning of streets, gutters etc, anti litter enforcement, sewerage, urban stormwater drainage, flood mitigation works, beach restoration, removal of dead animals, disposal of derelict or abandoned vehicles, street lighting, town planning, land clearing, pedestrian malls or plazas, women's rest centres, drinking fountains etc.

Recreation and culture: Includes public halls, civic centres, swimming pools and beaches, other indoor and outdoor sporting and recreation facilities, libraries, the operation and support of the performing arts, art galleries and orchestras, the preservation of the national estate, and the presentation of festivals.

Transport: Includes construction and maintenance of roads and bridges, road plant purchases, parking, aerodromes and other transport facilities such as wharves, jetties, docking slips etc.

Other: Includes rural services, tourism and area promotion, building control, saleyards and markets, other economic services (eg quarries, plant nurseries), natural disaster relief, and engineering and employment overheads together with plant purchases that cannot be classified elsewhere.

#### FINANCE - TRADING ACTIVITIES

This table shows the involvement of local authorities in trading activities (gas, electricity, water supply, sewerage, abattoirs and other).

#### INTEREST (ALL PURPOSES)

Interest Paid: To Commonwealth and State government public subscription loans, financial institutions, bank overdraft etc.

Interest Received: From Commonwealth government stocks and bonds, securities from state and local government authorities, banks, other (including the short term money market).

ROAD LENGTHS

## DESCRIPTION OF DATA ITEMS

## ROADS (KILOMETRES)

These statistics relate to roads which are open to the public and which are located within the area of each local authority whether they are the responsibility of the authority or not. Where a road forms the boundary between two local government areas half its length is accounted for by each area.

Sealed Roads: Those with bitumen, asphalt or concrete surfaces.

Formed and Surfaced Roads: Those with pavements constructed of gravel, rubble, limestone and by the use of soil stabilisation processes.

Formed Only Roads: Those without constructed pavement but which are formed by grader so that drainage of stormwater can occur.

Unformed Roads: Roads and tracks not elsewhere included above and which are customarily used by the public.

BUILDING

Building statistics relate to construction of new buildings and alterations and additions to existing buildings. Construction activity not defined as building (eg construction of roads, bridges, railways, earthworks etc.) is excluded.

Building statistics shown have two main components:

- (a) building approvals, based on permits issued by local government authorities and on contracts let and day labour approved by Commonwealth and State authorities. Major building activity which takes place in areas not subject to the normal administrative approval processes (eg building on remote mine sites) is also included.
- (b) building activity, based on a quarterly survey of builders and owner-builders collecting information about building work done on approved building jobs. The survey consists of two elements:
  - (i) a sample survey of private sector jobs involving new house construction or alterations and additions valued at \$10,000 or more to houses;
  - (ii) a complete enumeration of building jobs involving construction of new residential buildings other than private sector houses, construction of new non-residential buildings with an approval value of \$10,000 or more to buildings other than private sector houses up to June quarter 1985 and \$30,000 from September quarter 1985.

**DEFINITIONS**

A "building" is defined as a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design, to satisfy its intended use, is the provision for regular access by persons.

A "dwelling unit" is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for long term residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals, or temporary accommodation such as motels, hostels and holiday apartments, are not defined as dwelling units. The value of units of this type is included in the appropriate category of "non-residential building".

A "residential building" is defined as a building predominantly consisting of one or more dwelling units. Residential buildings can be either "houses" or "other residential buildings" as follows:

- (a) A "house" is defined as a detached building predominantly used for long term residential purposes and consisting of only one dwelling unit. Thus, detached "granny flats" and detached dwelling units (such as caretakers' residences) associated with "non-residential buildings" are defined as houses for the purpose of these statistics.

(b) An "other residential building" is defined as a building which is predominantly used for long term residential purposes and which contains (or has attached to it) more than one dwelling unit (eg includes townhouses, duplexes, apartment buildings etc).

COMPLETED - A building is defined as completed when building activity has progressed to the stage where the building can fulfil its intended function. In practice, the ABS regards buildings as completed when notified as such by respondents to the survey.

UNDER CONSTRUCTION - A building is regarded as being under construction at the end of a period if it has been commenced but has not been completed, and work on it has not been abandoned.

COMMENCED - A building is defined as commenced when the first physical building activity has been performed on site in the form of materials fixed in place and/or labour expended (this includes site preparation but excludes delivery of building materials, the drawing of plans and specifications and the construction of non-building infrastructures, such as roads).

For practical purposes, a building is regarded by the ABS as having commenced in a particular quarter when the value of work done on the job to the end of the quarter, reported on the Building Activity Survey form, is equal to or greater than the following threshold values:

- (a) for houses (including alterations and additions to houses), \$2,000;
- (b) for other residential building and non-residential building jobs (including alterations and additions to other residential buildings and non-residential buildings), \$5,000.

#### BUILDING CLASSIFICATION

OWNERSHIP - The ownership of a building is classified at the time of approval as either "private sector" or "public sector" according to the expected ownership of the completed building.

FUNCTIONAL CLASSIFICATION OF BUILDINGS - A building is classified according to its intended major function. From the September quarter 1983, a building which is ancillary to other buildings or forms a part of a group of related buildings is classified to the function of the building and not to the function of the group as a whole. An example of this can be seen in the treatment of building work approved for a factory complex. In this case a detached administration building would be classified to Offices, a detached cafeteria building to Shops, while factory buildings would be classified to Factories. An exception to this rule is the treatment of group accommodation buildings where, for example, a student accommodation building on a university campus would be classified to Education.

Examples of the types of individual building jobs included under each main functional heading are shown in the following list:

- (a) House: Includes 'cottages', 'bungalows', detached caretakers'/managers' cottages, rectories;
- (b) Other Residential Dwellings: Includes blocks of flats, home units, attached townhouses, villa units, terrace houses, semi-detached houses, maisonettes;
- (c) Hotels, etc.: Includes motels, hostels, boarding houses, guest houses, holiday apartment buildings;
- (d) Shops: Includes retail shops, restaurants, cafes, taverns, dry cleaners, laundromats, hair salons, shopping arcades;
- (e) Factories: Includes paper mills, oil refinery buildings, brickworks, foundries, power-houses, manufacturing laboratories, workshops as part of a manufacturing process;
- (f) Offices: Includes banks, post offices, council chambers, head and regional offices;
- (g) Other business premises: Includes warehouses, storage depots, service stations, transport depots and terminals, electricity substation buildings, pumping station buildings, telephone exchanges, mail sorting centres, broadcasting stations, film studios;
- (h) Educational: Includes schools, colleges, kindergartens, libraries, museums, art galleries, research and teaching laboratories, theological colleges;
- (i) Religious: Includes churches, chapels, temples;
- (j) Health: Includes hospitals, nursing homes, surgeries, clinics, medical centres;
- (k) Entertainment and Recreational: Includes clubs, theatres, cinemas, public halls, gymnasiums, grandstands, squash courts, sports and recreation centres;
- (l) Miscellaneous: Includes law courts, homes for the aged (where medical care is not provided as a normal service), orphanages, gaols, barracks, mine buildings, glasshouses, livestock sheds, shearing sheds, fruit and skin drying sheds, public toilets and ambulance, fire and police stations.

#### VALUATION OF BUILDING JOBS

The value series in this publication is derived from estimates reported on survey returns as follows:

- (a) "Value of building approved, commenced, or under construction" represents the anticipated completion value based, where practicable, on estimated market or contract price of building jobs excluding the value of land and landscaping. Site preparation costs are included. Where jobs proceed over several quarters the anticipated completion value reported on the return for the first (commencement) quarter may be amended on returns for subsequent (under construction) quarters as the job nears completion;
- (b) "Value of building completed" represents the actual completion value based, where practicable, on the market or contract price of building jobs including site preparation costs but excluding the value of land and landscaping;
- (c) "Value of building work done during the period" represents the estimated value of building work actually carried out during the quarter on jobs which have commenced;
- (d) "Value of building work yet to be done" represents the difference between the anticipated completion value and the estimated value of work done on building jobs up to the end of the period.

TABLE 3

**DESCRIPTION OF AREA CLASSIFICATIONS  
AND  
ABS CODE LISTS**

## TABLE 3 - DESCRIPTION OF AREA CLASSIFICATIONS AND ABS CODE LISTS

This table is in three parts; the first part consists of definitions of the geographical areas used in AMIS together with a description of the coding used; the second part is a list of SLAs in alphabetical order, grouped into the Statistical Divisions to which they relate, within States; the third part shows the relationship between ASGCs and some other ABS area codes (these codes were translated, as appropriate, into ASGCs for the purpose of preparing this publication).

## TABLE 3 PART 1

Definitions of areas used in AMIS together with a description of the area coding (ASGC).

## STATISTICAL DIVISION

Statistical Divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities. Capital City Statistical Divisions are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated Urban Centres) for a period of at least twenty years.

## LEGAL LOCAL GOVERNMENT AREA (LGA)

Legal LGA's are the elective bodies responsible for municipal government constituted under the respective State Local Government Acts, or special Acts for Melbourne, Geelong, Brisbane, Hobart and Launceston, carrying out delegated functions within geographically limited areas of the States. Their number varies from time to time due to amalgamation and the growth of urban areas.

## STATISTICAL LOCAL AREA (SLA)

The term Statistical LA refers to a spatial unit which covers the following set of unit types:

- (i) parts of particular whole legal LGA's (obtained by splitting the LGA's in accordance with the boundaries of certain other spatial units which cut across the LGAs, ie boundaries of Statistical Districts, Subdivisions, Divisions and Statistical Retail Areas);
- | (ii) suburbs of legal LGA's in Queensland and the Northern Territory;
- | (iii) whole legal LGA's (where not subject to splitting as in (i))
- (iv) LGA equivalent areas in the NT and the ACT; and
- (v) unincorporated areas or broad subdivisions of these and off-shore areas not covered by the foregoing.

AREA CODES USED IN AMISINTRODUCTION

The area codes used in AMIS are based on the Australian Standard Geographical Classification (ASGC) for statistical purposes (ABS Catalogue No. 1216.0). The area codes used fall into the following categories:

- (i) Usual Area Codes - 9 character ASGC codes;
- (ii) Area Codes for SLA's that have ceased to exist - 11 character codes consisting of a 9 character modified ASGC code with a 2 character year code indicating the year in which the SLA ceased to exist;
- (iii) State Total - 1 character ASGC code;
- (iv) Statistical Division Totals - 3 character ASGC codes;
- (v) Five character ASGC codes - for Legal LGA's that are crossed by statistical boundaries e.g. Statistical Division boundaries; and
- (vi) Special Area Codes - these can be either 5 or 9 character codes and are used where valid ASGC codes do not exist. The 5 character codes are used if the area is crossed by any statistical boundary otherwise the 9 character codes are used.

Examples are given below.

AREA CODES USED IN AMIS

The majority of the codes used in AMIS are ASGC codes. A modified ASGC code has been used where no actual ASGC code exists. The code system used is either:

CHARACTER	USE
1	State Identifier
2-3	Statistical Division
4-5	Statistical District or Subdivision
6-9	Statistical Local Area (SLA) where character 9 indicates the following characteristics: <ul style="list-style-type: none"> <li>- 0 indicates that the SLA is also a current Legal LGA;</li> <li>- 1 to 8 indicates that the SLA is a part of a Legal LGA. In the case of SLA's or LGA's that have ceased to exist, the area will now be part of a current Legal LGA, therefore, the 9th character will always be in the range 1 to 8;</li> <li>- 9 indicates that the SLA represents either an unincorporated area, an off-shore/migratory category or an undefined category.</li> </ul>
10-11	Year code for SLA's that have ceased to exist (the year shown is the last year that the SLA existed e.g. 80 shows that the SLA existed in 1980 but not in 1981). These characters are only used if the SLA's or LGA's have ceased to exist.

OR

Legal LGA's that are crossed by statistical boundaries cannot be incorporated in 9 character ASGC codes but can be incorporated in 5 character ASGC codes which use the State Identifier together with the SLA code as follows:

<u>CHARACTER</u>	<u>USE</u>
1 2-5	State Identifier SLA

Refer to the ASGC Manual for further details of ASGC codes and descriptions.

#### EXAMPLES OF AREA CODES USED IN AMIS

All examples used are based on the State of Queensland, the Brisbane Statistical Division and the Legal LGA's of Brisbane City, Albert Shire and Logan City.

- (i) Usual Area Codes - 305100051 represents Beenleigh, part of Albert Shire (part A);
- (ii) Area Codes for SLA's that have ceased to exist - 30505119385 represents Cribb Island, part of Brisbane City (this area ceased to exist in 1985);
- (iii) State Total - 3 represents Queensland State Total;
- (iv) Statistical Division Totals - 305 represents Brisbane Statistical Division;
- (v) Other ASGC Area Codes - 30050 represents Albert Shire (total);
- (vi) Special Area Codes - 305100052 represents Albert Shire (total of part A),  
- 34654 represents Waterford (total),  
Waterford (part A) is a part of Albert Shire (part A) and Waterford (part B) is a part of Logan City.

## TABLE 3 PART 2

SLA's in alphabetical order grouped into Statistical Divisions within States.

At the end of each state (where necessary) is a table of the LGAs that cross statistical boundaries together with the component ASGCs.

STATE/TERRITORY	PAGE
New South Wales	3.2.2
Victoria	3.2.11
Queensland	3.2.19
South Australia	3.2.32
Western Australia	3.2.40
Tasmania	3.2.46
Northern Territory	3.2.50
Australian Capital Territory	3.2.53

## TABLE 3 PART 3

SLA's together with the following ABS codes: ASGC, SAC, Population Census (including ADDS), AMIS, SLGFS, Vitals, Retail and Building.

Full details of the Australian Standard Geographic Classification (ASGC) codes and of the extensions made to them for AMIS can be found on page 3.1.3.

When comparing data from various collections for different periods it should be remembered that the area codes used are subject to change from time to time. The appropriate codes for each period have been used when preparing this release. All codes, except those for SLGFS and those ASGC codes that have been created for AMIS time series purposes, can be found in the ASGC manual.

The codes in this table are valid for the following periods:

<b>Code</b>	<b>Period</b>
ASGC	as at 1 January 1986
Population Census (incl ADDS)	as at 1 January 1986
SLGFS	year ended 30 June 1986
Vitals	as at 1 January 1987
Building	as at 1 July 1988
Retail	as at 1 January 1986

The components of the various codes are as follows:

(i) ASGC and Population Census (including ADDS) (9 characters)

<u>Character</u>	<u>Definition</u>
1	State identifier
2-3	Statistical Division
4-5	Statistical district or subdivision
6-9	Statistical local area

(ii) SLGFS (4 characters)

<u>Character</u>	<u>Definition</u>
1	State identifier
2-4	Local Government Authority Code

(iii) Vitals (5 characters)

<u>Character</u>	<u>Definition</u>
1	State identifier
2-5	Statistical Local area

(iv) Building (7 characters)

<u>Character</u>	<u>Definition</u>
1	State identifier
2-3	Statistical division
4-7	Statistical local area

(v) Retail (5 characters)

<u>Character</u>	<u>Definition</u>
1	State identifier
2-5	Statistical Local area

**TABLE 4**  
**BOUNDARY CHANGES**

## TABLE 4 - BOUNDARY CHANGES

This table lists, for each State, the major boundary changes for SLA's and LLGA's since 1.7.1967 and also changes of name that have occurred between 1.7.1967 and 31.1.1988 irrespective of whether there have been concurrent boundary changes or not.

State/Territory	Page
New South Wales	4.2
Victoria	4.9
Queensland	4.10
South Australia	4.12
Western Australia	4.16
Tasmania	4.18
Northern Territory	4.18
Australian Capital Territory	4.18

Symbols used in this table:

B	-	Borough
C	-	City
DC	-	District Council
M	-	Municipality
S	-	Shire
T	-	Town
U	-	Unincorporated

LOCAL GOVERNMENT AREA	NATURE OF CHANGE	AREA (HECTARES)	ESTIMATED POPULATION INVOLVED	DATE OF CHANGE
Abercrombie S	Parts of the Shires of Abercrombie and Turon (20 835 hectares combined, estimated population 2 170) were transferred to the City of Bathurst. The balances of these former Shires were amalgamated to form Evans Shire (population at 30 June 1977 was estimated at 3 900).	- 232 400(a)	2 750	1.10.77(d)
